CATALOGUE SUPPLEMENT 1954

This catalogue is intended as a supplement to our 1953 catalogue. If you have lost or misplaced your copy, (or if you did not receive one), please let us know and we will send you one.

And in the spring the glory of the primrose border is a sure cure for all accumulated sorrows of the soul — if you go out each morning after breakfast and again at sunset. Walk softly! For if you search for Him, you may find God walks there.

Linda A. Eickman

NOT IN STOCK 1954

We are not able to supply this year the following plants listed in our 1953 catalogue:

PRIMROSES

P. anisodora
P. canescens
P. capitata
P. Cockburniana

HIDATSA—Free flowering, dwarf (8") plant with burgundy blossoms.
JASPER SPOON—Semi-double spoon, silver petals with rose tips.
JOHN BAXTER—Deep bronze, medium sized flowers. Late August.

WE HEARTILY RECOMMEND

BLUE WHALE BRAND PEAT MOSS

"BLUE WHALE BRAND" is Sundried Sphagnum Peat Moss containing Dehydrated Whale Soluble, Digested Whale Bone and Whale Baleen with Marine Marl. It is a product that not only promotes the growth of your plants by Nature's Organic method, conserves moisture, but the entire product becomes Humus for your soil. Used as a covering on seed pans it gives us much stronger seedlings, used as a mulch around plants it gives us far healthier, sturdier plants. Mix it with your potting soil, use it as a top dressing on your lawn for it is the best thing of its type we have ever found.

We advise you to TRY IT — USE IT — PROVE IT.

SNOWFALL—Medium sized, double white flowers. Late Sept.

SUNBEAM—Bright golden, medium sized flowers. Late August.

YELLOW QUILL—Fully double large flowers with cord-like petals.
Late Sept.

SHOW AURICULAS

For the past three years we have been able to import a few seed of crosses between the best named British Show Auriculas. This year we expect to bloom about 400 of these seedlings and have them available for sale at prices ranging from \$2.00 to \$5.00 for "Self" types, and \$5.00 to \$10.00 for "Edged" types. If you are interested in these aristocrats of the garden write us about supply and prices.

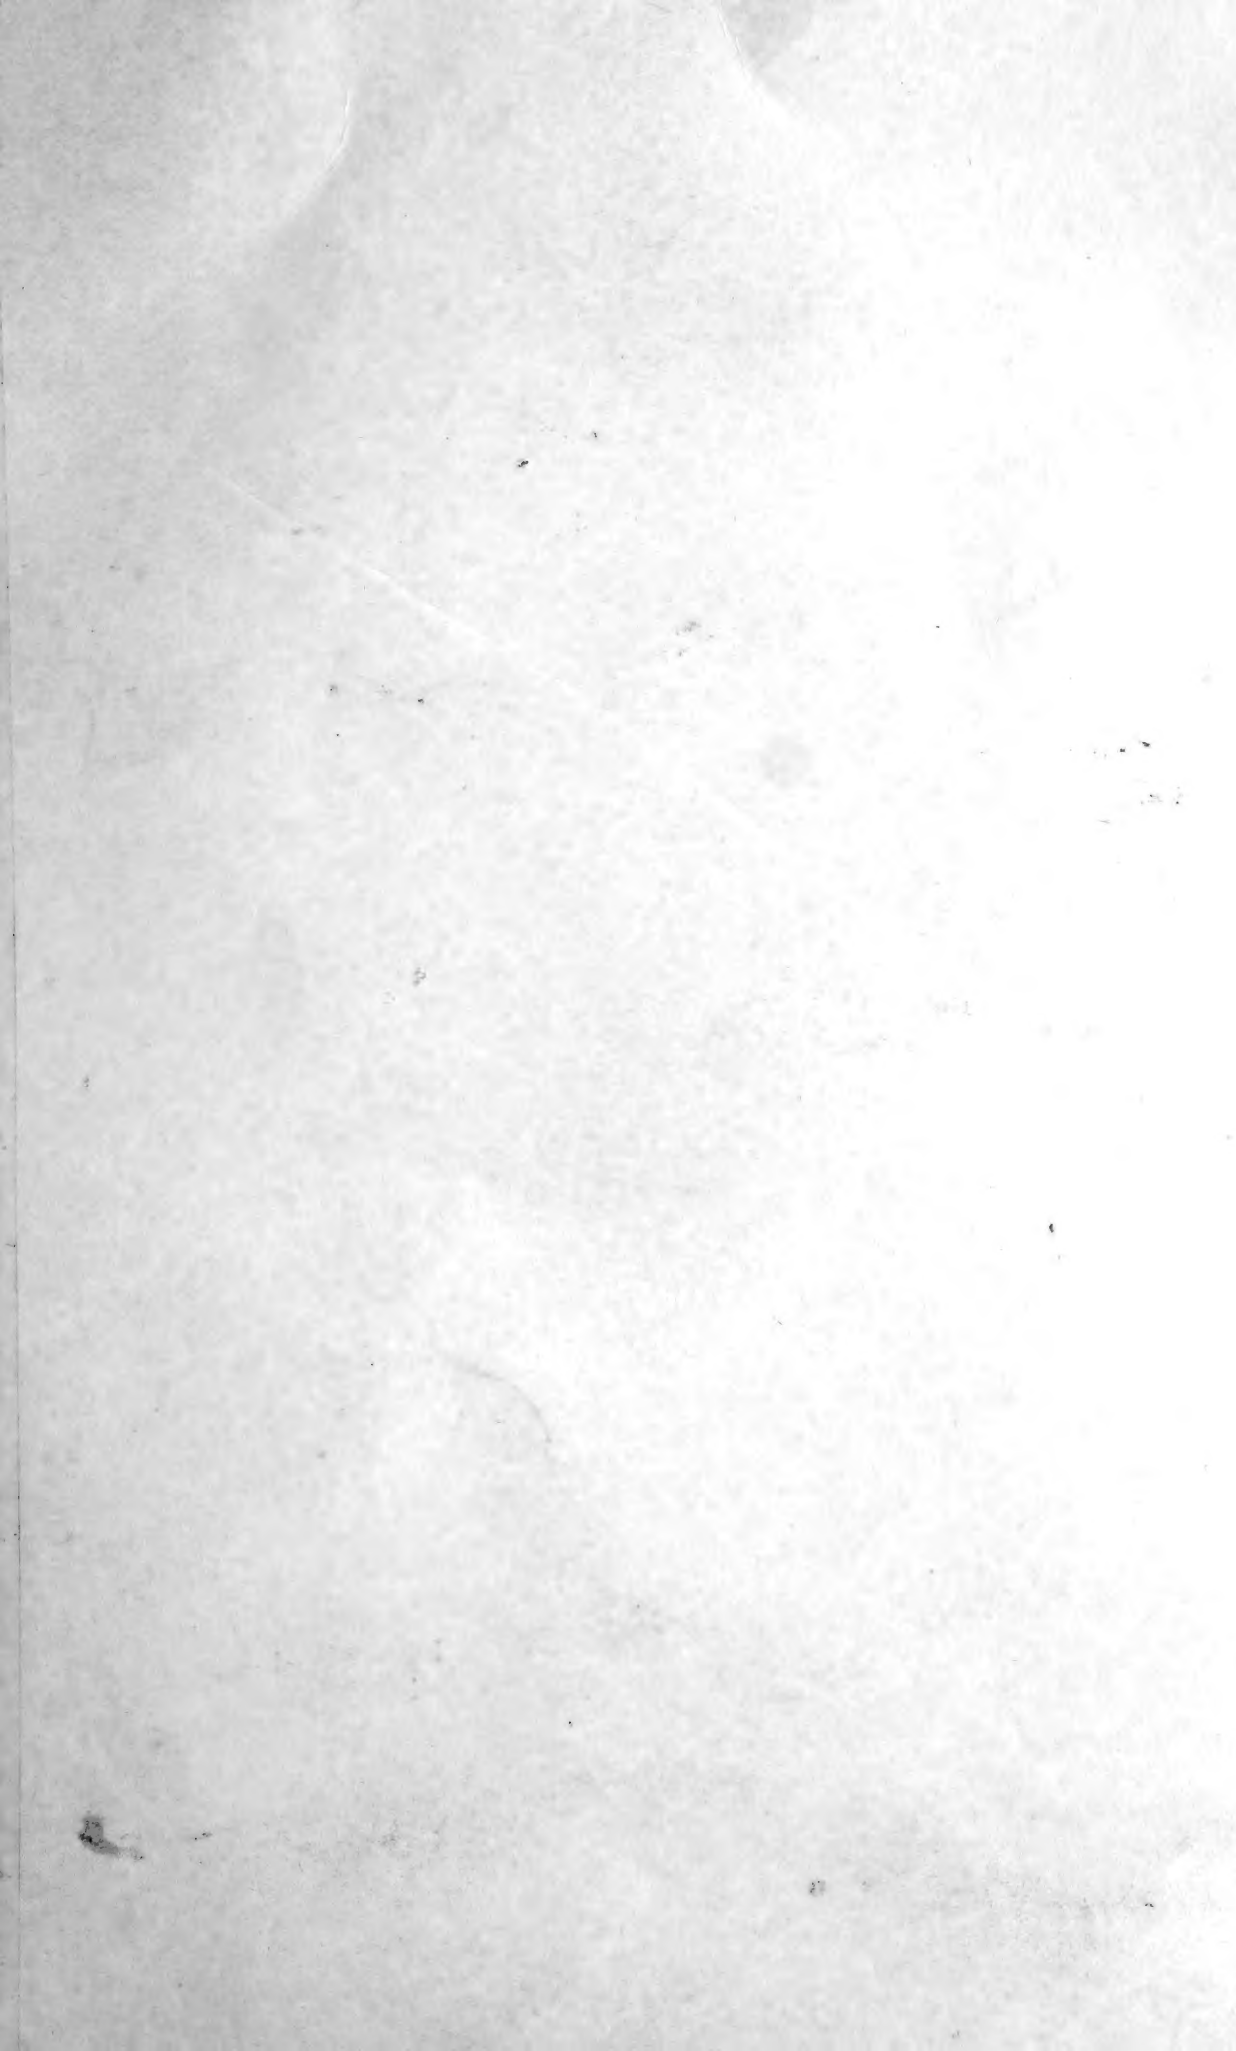

SHIPPING INSTRUCTIONS

All orders for seed in any amount sent postpaid.

On plant orders we will prepay via parcel post orders in the amount of \$5.00 or more. On orders for a smaller amount of money \$.15 per plant to cover postage and handling. Washington residents please add 3% sales tax to all seed and plant orders.

The addition of \$.25 to any order will enable us to send that order "special handling"; this insures 1st class mail service to the parcel, getting your plants to you faster and in better condition.

WE GUARANTEE THE SAFE ARRIVAL IN VIABLE CONDITION OF YOUR PLANTS. (This guarantee limited to replacement of the plants, only).

SEED LIST (CANCELS 1953 LIST)

P. chionantha	.50	P. Viali	.50
P. Halleri	.75	P. Wilsoni	.50
P. involucrata	.50		

New Primroses This Year

- P. ACAULIS HYBRIDS**—50c each. Again this year we have what we hope will be an adequate supply of these magnificently colorful plants, the true "Primroses." Your choice of colors.
- P. ALPICOLA VAR. ALBA**—Seed only 1954. A large flowered, white, Sikkimensis type. Very choice.
- P. ALPICOLA VAR. VIOLACEA**—Seed only 1954. One of the very top primroses. A Sikkimensis type with flowers ranging in color from burgundy to blue with a large creamy eye.
- P. BULLEYANA**—75c each. This strong, vigorous, bright orange Candelabra we think to be one of the top plants of its type.
- P. CHUNGENSIS**—Seed only 1954. Another orange flowered Candelabra very different from P. Bulleyana. Blooms in June.
- P. DARIALICA**—1.00 each. Like P. frondosa, but a separate and distinct specie. Blooms in April.
- P. FORRESTII**—\$3.50 each. A magnificent showy plant for the rock garden or shady border, quite new to American gardens. Carries a very showy, large, umbel of bright yellow flowers in May.
- P. SCAPIGERA**—\$5.00 each. The small dusty leaves and huge pink flowers of this March blooming rock garden plant make it a favorite of everyone who sees it. Needs a little winter protection in severe climates, although it is perfectly hardy in our garden.
- P. SECUNDIFLORA**—Seed only 1954. Deep burgundy bells make this tall Sikkimensis type a sensation in the shady border. Blooms in June.
- P. YARGONENSIS**—Seed only 1954. A violet shaded cousin of P. involucrata. Similar to P. involucrata in all respects except color.
